Description

About the Role

We're seeking motivated individuals ready to step into the world of self-publishing through a proven freelance writing framework. This remote opportunity is designed for beginners who want to earn online by creating and publishing short, structured Kindle eBooks using a simple, repeatable system. Instead of bidding for client jobs or writing endless blog posts, you'll be producing your own income-generating digital assets—books that once published, continue to earn royalties without additional effort.

This isn't a typical freelance contract. There are no clients, no deadlines, and no pitching. You'll follow a self-guided publishing roadmap that teaches you how to build and release books on Amazon Kindle—even if you've never written professionally before.

- Publish books directly to Kindle and earn royalties on every sale or page read

The system includes full training, templates, and walkthroughs. All you need to bring is time, focus, and a willingness to learn.

Who This is Best For

This freelance publishing model is ideal for:

- New writers looking to avoid bidding wars and client work

- Retirees or career changers exploring digital income
- Side hustlers tired of social media-based business models

This is not a salaried role. You will earn royalties on every sale and every page read via Amazon Kindle. Income varies based on output, niche selection, and consistency.
