# Digital Publishing Operator | Online Entry Into Kindle Marketplace

### Description

## Position Summary

We're seeking Online Publishing Operators to help manage and execute the release of nonfiction Kindle books using an AI-supported publishing system. This remote position is entry-level and requires **no previous experience, no formal education, and no writing background**. You'll be equipped with everything needed to create fully formatted eBooks and upload them to Amazon's Kindle Direct Publishing platform.

You won't be writing creatively or designing marketing materials. Instead, you'll follow a defined set of instructions to produce, format, and launch nonfiction books that can generate ongoing royalty income. If you're organized, task-focused, and want to build assets instead of working gigs, this opportunity is designed for you.

## What You'll Do

As a Publishing Operator, your role is to implement a five-phase workflow that transforms topic ideas into published digital books. You'll be using templates, AI-generated content, and a series of checklists to guide the process.

## Discover High-Demand Topics

You'll begin by evaluating potential book topics using keyword analysis and niche research templates. Instead of guessing what readers want, you'll work from proven selection criteria to find categories with consistent buyer interest.

## Guide Content Creation with AI

Once your topic is selected, you'll use AI writing assistants to draft the book's content. You'll guide this process using prompt packs and outline templates, making it easy to create structured, reader-friendly nonfiction manuscripts between 3,000 and 7,000 words.

## Format the Manuscript for Kindle

After the draft is completed, you'll follow a step-by-step formatting guide to prepare the manuscript for Kindle compatibility. You'll insert chapters, apply heading styles, and ensure clean layout and spacing without any design experience required.
