LEARN MORE

Online AI Setup Trainee | Remote Work | No College Degree or Prior Experience Required | Build Real Automation Systems

Description

Want to start working remotely and learn a skill that's in high demand—without dealing with customers, learning to code, or spending a dime? This remote training role is designed to help you build automation systems that function like digital employees, handling routine business tasks such as scheduling, follow-up messages, and lead management.

You'll begin with a **free 5-day onboarding challenge**, where you'll use easy, no-code tools to build a live system from scratch. It's perfect for complete beginners who want hands-on experience and a skill that applies directly to the way businesses operate today.

What You'll Create in 5 Days

This guided training walks you through creating a system that includes:

- A digital form to collect lead or customer data
- An automated booking tool that manages appointments
- Email and text message workflows that follow up automatically
- A tagging system that segments contacts for follow-up
- Backend logic that keeps everything running with no manual input

All tools are browser-based—no software downloads, no special hardware.

What You'll Learn to Do

By the end of the program, you'll understand how to:

- Create backend automations for digital businesses
- Use logic to build automated workflows that reduce manual work
- Build and manage simple systems using no-code software
- Support remote operations in a non-customer-facing way
- Replicate your system for different industries or clients

This skill can open the door to freelance work, remote support, and operations roles.

Who This Is Perfect For

This opportunity fits well if you're:

Hiring organization

Remote Tech Jobs

Employment Type

Full-time, Part-time, Contractor

Industry

Customer Service

Job Location

- Exploring remote work for the first time
- Looking to build a valuable skill without overwhelming complexity
- A freelancer or VA who wants to expand into backend systems
- Someone who enjoys process-oriented work
- Curious about AI but not interested in technical jobs

Base Salary
\$ 5000 - \$ 10000

If you enjoy learning step-by-step and building something functional, this training was made for you.

Date posted
April 29, 2026

What You Don't Need

Valid through
01.01.2029

You won't need:

- A degree or resume
- Any previous experience with tech or automation
- Sales, customer service, or marketing skills
- To download or purchase anything
- To pay for the training—it's free and beginner-friendly

You'll only need a computer, internet access, and a willingness to learn.

Why This Skill Matters in 2025

The rise of AI and automation has created a new demand for people who can set up the systems that make it all run. These are not flashy roles, but they're critical—and businesses are looking for people who can deliver real solutions without needing to hire full-time developers.

This training helps you step into that need with confidence.

What You'll Leave With

After finishing the 5-day challenge, you'll have:

- A fully working automation system built by you
- Templates and flows you can reuse for future projects
- Practical experience with no-code tools used in business today
- A beginner-friendly skill that's aligned with remote work opportunities
- A clear first step toward building a remote work or freelance career

You won't just learn—you'll create something useful.

FAQs

Is this a job?

This is a training experience that mirrors the kind of tasks performed in real-world remote automation support roles. While not formal employment, the skill is directly marketable.

Is the training free?

Yes. The entire onboarding process, tools, and resources are provided at no cost.

Will I be talking to customers or doing sales?

No. This is strictly backend system work.

Can international participants join?

Yes. The training is fully remote and open worldwide.

What's the time commitment?

Expect to spend 1–2 hours per day across five days. You can go faster or slower as needed.

How to Apply

Click the “**Learn More**” button below to access your training dashboard. From there, you’ll begin building your own backend automation system—without prior experience, without any cost, and without unnecessary complexity.
