Online AI Support Developer | Remote Work | No Prior Experience Required | Step-by-Step Complimentary Training Available

Description

Curious about working in tech but unsure where to begin? This remote role introduces you to the world of automation by showing you how to build simple, real-world AI systems that businesses use to manage their day-to-day operations. No experience, degree, or technical background required.

You'll start with a **free, structured 5-day onboarding program** where you'll build your first working automation system. Using no-code tools, you'll set up workflows that replicate the work of a digital assistant—handling follow-ups, scheduling, and contact management—all from your own computer.

What You'll Build from Scratch

Over five guided sessions, you'll create a fully functioning automation system that includes:

- A digital lead capture form that organizes customer info
- Smart calendar integration that automates bookings
- Email and SMS workflows that run on autopilot
- Logic-based tagging for contact organization
- End-to-end automation that reduces repetitive work

You'll walk away with your own working system and the confidence to replicate it for real-world applications.

What You'll Be Able to Do After Training

Once you complete the training, you'll know how to:

- Set up backend automation systems for digital teams or solo businesses
- Use drag-and-drop interfaces to implement logic-driven workflows
- Support remote teams with tools that operate behind the scenes
- Repurpose and tweak your system across industries and service types
- Contribute to business growth without customer-facing or sales tasks

This is practical, plug-and-play knowledge for anyone entering the digital economy.

Job Location
Remote work from: United States; Canada; Australia; United Kingdom; New Zealand; Ireland; Scotland; Sweden; Belgium; Spain; Czech Republic; Brazil; France; India; South Africa; Denmark; Germany; Philippines; Mexico; India; Indonesia; Alabama, USA; Alaska, USA; Arizona, USA; Arkansas, USA; California, USA; Colorado, USA; Connecticut, USA; Delaware, USA; Florida, USA; Georgia, USA; Hawaii, USA; Idaho, USA; Illinois, USA; Indiana, USA; Iowa, USA; Kansas, USA; Kentucky, USA; Louisiana, USA; Maine, USA; Maryland, USA; Massachusetts, USA; Michigan, USA; Minnesota, USA; Mississippi, USA; Missouri, USA; Montana, USA; Nebraska, USA; Nevada, USA; New Hampshire, USA; New Jersey, USA; New Mexico, USA; New York, USA; North Carolina, USA; North Dakota, USA; Ohio, USA; Oklahoma, USA; Oregon, USA; Pennsylvania, USA; Rhode Island, USA; South Carolina, USA; South Dakota, USA; Tennessee, USA; Texas, USA; Utah, USA; Vermont, USA; Virginia, USA; Washington, USA; West Virginia, USA; Wisconsin, USA; Wyoming, USA

This path is ideal for:

- First-time remote workers looking for structure
- Beginners who want a clear, guided way to learn digital skills
- Freelancers and VAs looking to add valuable backend services
- People seeking behind-the-scenes roles without phone calls or outreach
- Curious learners who want to explore AI in a hands-on, low-pressure setting

You don't need to be techy—just focused, reliable, and ready to follow a system.

What You Won't Need

Forget about barriers. You won't need:

- A college degree or resume
- Previous job experience or technical skills
- To talk to customers or pitch services
- Paid tools, downloads, or hidden upsells
- Any payment to get started

Everything you need is included and runs in your browser.

Why This Is a Smart Skill to Learn

Automation is already woven into how businesses run—but most companies still need help setting up the tools. By learning to configure backend systems, you position yourself as the person who makes digital operations possible.

Rather than compete in crowded job pools, you'll quietly build systems that do the work for others.

What You'll Walk Away With

After completing your free onboarding, you'll have:

- A fully functional backend automation you built yourself
- Reusable templates and workflow models
- A strong foundation in no-code platforms used globally
- A job-aligned skill that opens doors to freelance or support work
- The confidence to take on backend digital roles immediately

You'll have done the work—not just studied it.

FAQs

Is this a job?
It's not a formal job offer. It's a training experience designed to help you build skills used in real AI support and automation roles. It prepares you for actual backend work in digital teams.

Is the training really free?
Yes. No credit card, no upsells, no software purchases. The full 5-day program is free.

Do I need to be good at tech?
No. It's built specifically for people starting from zero.

Base Salary
$ 5000 - $ 10000

Date posted
July 30, 2025

Valid through
01.01.2029

Is this available internationally?
Yes. Anyone with a computer and internet access can join remotely.

How long will it take?
Plan for 1–2 hours per day over five days. It's self-paced and flexible.

How to Get Started

Click the "**Learn More**" button to begin your onboarding. You'll immediately unlock your training dashboard and begin building a fully functional automation system that reflects what real businesses need today.
