LEARN MORE

Online Digital Systems Trainee | Build AI-Driven Workflows Online | No Technology Background Required

Description

Want to start working remotely but feel stuck without experience or a degree? This entry-level training path gives you hands-on experience in setting up backend automation systems—tools that businesses use every day to handle routine tasks like appointment booking, lead follow-up, and contact organization. These systems act like digital assistants, and you'll learn how to build them.

You'll begin with a **free, structured 5-day training program** designed for total beginners. By the end of the challenge, you'll have a fully functional workflow that mirrors the kind of support tasks remote teams use to scale.

What You'll Build from the Ground Up

This isn't passive training. You'll build your first full system using browser-based, drag-and-drop tools. It will include:

- A custom form to gather lead and customer information
- An automated calendar booking flow
- Email and SMS workflows that run on auto-pilot
- Contact segmentation via dynamic tagging
- Logic-based workflows that operate behind the scenes

You'll get your hands dirty in the best way—building something real that actually works.

What You'll Know How to Do

By the end of training, you'll understand how to:

- Set up backend workflows that support small businesses and service providers
- Use automation tools to reduce repetitive work
- Create systems that run without constant oversight
- Adapt your workflow for various industries and service types
- Offer implementation help in freelance or support roles

You'll be equipped with a job-aligned skill without needing prior knowledge or certifications.

Customer Service

Job Location

Remote work from: United States; Canada; Australia; United Kingdom; New Zealand; Ireland; Scotland; Sweden; Belgium; Spain; Czech Republic; Brazil; France; India; South Africa; Denmark; Germany; Philippines; Mexico; India; Indonesia; Alabama, USA; Alaska, USA; Arizona, USA; Arkansas, USA; California, USA; Colorado, USA; Connecticut, USA; Delaware, USA; Florida, USA; Georgia, USA; Hawaii, USA; Idaho, USA; Illinois, USA; Indiana, USA; Iowa, USA; Kansas, USA; Kentucky, USA; Louisiana, USA; Maine, USA; Maryland, USA; Massachusetts, USA; Michigan, USA; Minnesota, USA; Mississippi, USA; Missouri, USA; Montana, USA; Nebraska, USA; Nevada, USA; New Hampshire, USA; New Jersey, USA; New Mexico, USA; New York, USA; North Carolina, USA; North Dakota, USA; Ohio, USA; Oklahoma, USA; Oregon, USA; Pennsylvania, USA; Rhode Island, USA; South Carolina, USA; South Dakota, USA; Tennessee, USA; Texas, USA; Utah, USA; Vermont, USA; Virginia, USA; Washington, USA; West Virginia, USA; Wisconsin, USA; Wyoming, USA

Who This Is a Good Fit For

This opportunity is perfect for:

- People new to remote work or digital roles
- Anyone who prefers technical setup over communication-heavy work
- Freelancers and virtual assistants ready to expand their offerings
- Learners who enjoy structured tasks and predictable outcomes
- Self-motivated individuals seeking practical, real-world experience

If you want to learn something that gives you flexibility and value, this is a smart place to start.

Base Salary

\$ 5000 - \$ 10000

Date posted

April 29, 2026

Valid through

01.01.2029

What You Don't Need

No fancy qualifications or technical skills are required. You won't need:

- A degree, resume, or job history
- Sales or customer service skills
- Coding experience or software installation
- To spend any money during onboarding

The training is free, the tools are included, and the setup is 100% online.

Why This Skill Is in High Demand

AI may be transforming business, but companies still need people to set up and manage their systems. Most small businesses don't have full-time staff for this—and that's where you come in.

By learning automation configuration, you gain a durable skill that aligns with how real businesses function behind the scenes.

What You'll Walk Away With

At the end of the challenge, you'll leave with:

- A complete automation system you've personally built
- Templates and flows you can use again
- Fluency in popular no-code automation platforms
- A job-ready skill that supports backend digital operations
- A step into the world of remote tech without gatekeeping

You'll have created something valuable—and repeatable.

FAQs

Is this a job or training?

This is a training experience that mirrors work done in real-world backend automation support. While not a job listing, it equips you with skills relevant to freelance and remote operations roles.

Is there any cost involved?

No. The full 5-day onboarding is free and includes all required software and resources.

Do I need to be good with tech?

No. The program is designed for non-technical beginners.

Is this available outside the U.S.?

Yes. Anyone worldwide with internet access can participate.

How much time does it take?

Roughly 1–2 hours per day across five days, though you can work at your own pace.

How to Apply

Click the “**Learn More**” button to access your onboarding dashboard. You’ll begin your first build immediately using guided instructions and built-in tools. No setup, no stress—just results.

Click “**Learn More**” now to launch your remote career in digital systems.
